

“A Dental Practice Offering First-Class Results.”

While providing state of the art dentistry in restoration and function, the dental practice of Clayton Cooke, D.D.S., continues to offer superior dentistry for the entire family.

For more than 35 years, Dr. Cooke's unwavering mission to each and every patient is providing a comfortable and compassionate environment.

“We provide a place for families to come where they can have excellent care in a peaceful and gentle manner,” Dr. Cooke said. This kind-hearted approach towards patients promotes a great dental experience for all, especially for the younger members of his practice.

Dr. Cooke and his friendly team of dental professionals remain committed in personalized attention through the art of communication. Patients appreciate the fact they are listened to and their questions addressed.

Dr. Cooke and his team take pride in their patient partnership. This special relationship paves the way toward excellent preventative care and good oral health.

Home care programs are a critical component to preserve great oral hygiene. Understanding that each patient is different, Dr. Cooke and his dental hygienist tailor the right program when it comes to brushing,

flossing and other select routines.

Dr. Cooke describes their home care programs as a true team effort.

“We help our patients establish a daily care regimen for oral health to last a lifetime,” he said. “And for the younger members of our practice there is a combination of informing their conscientious parents so instructions are reinforced on a daily basis.”

Dr. Cooke's mission is to help his patients maintain excellent oral hygiene so they can remain healthy. Individuals, he said, can't be reminded enough regarding the connection between good oral hygiene and overall physical wellness.

Medical studies have revealed a direct link of poor oral health to ailments such as heart disease and respiratory challenges. A healthy body and excellent oral health go hand in hand.

Dr. Cooke's dental practice prepares its younger patients for a lifetime of oral hygiene success. “The experts in our office are very well-trained in provid-

ing wonderful care to our younger members, and they enjoy coming here,” Dr. Cooke said. “And that is our biggest reward.”

Dr. Cooke's state-of-the-art neighborhood practice offers a full range of comprehensive family dentistry including preventative care, restorative and reconstructive care, and cosmetic and smile enhancement services.

Dr. Cooke's advanced education, along with his innate hand-eye three dimensional coordination, enables him to raise restorative dentistry to a whole new level.

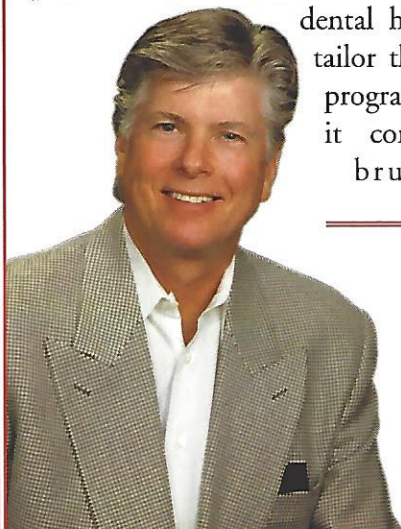

“I've been very fortunate to have had some wonderful education and continued education over the years,” said Dr. Cooke, noting the close professional relationships he's had with top founders in dental implantology since the 1970s.

During the course of his career, Dr. Cooke has placed more than 500 dental implants.

“We have taken patients from having a handicap mouth to where they can feel whole again by smiling and chewing comfortably,” he said.

Dr. Cooke's family dentistry practice is there to help patients at every stage of life since dental care is a lifelong commitment.

Dr. Cooke extends a warmhearted thanks to his current patients while looking forward to meeting his new patients.
